

## COMPANY PROFILE

KOME<sup>®</sup> TECHNOLOGY IND CO., LTD, was established in 1990, which was an enterprise focused in researching, manufacturing and selling reliability testing device, which including High and Low Temperature Testing chamber, Power Battery High and Low Temperature Explosion Proof Test Chamber, Thermal Shock Testing Chamber, Walk-in Temperature and Humidity Test Chamber, Temperature and Humidity Altitude test Chamber, Precious Oven Test Chamber, etc.

In order to offer customer with prompt feedback to our customers, we have built branches or agents in East China, South China, Mid China, North China and West China. Prompt reaction to customer's requirement offers us high reputation in our customers from all industrial field, such as electronics, electrics, new power auto, communication, chemistry, institutes, military, UAV, etc.

In 2003, we cooperated with PKU and successfully developed the first VOC test chamber in China, which is now locates in PKU-HKUST ShenZhen-HongKong Institution, and gained reward from The Natural Science Foundation of China . In order to increase our production capacity and grasp rapid change of the market, we move to Songshanhu industrial park, a National high-tech park in Songshanhu, Dongguan, and built producing factory 1 and factory 2, which is about 10000 M. Both of our factories strictly obey ISO9001 and ISO14001 standards, to ensure high performance and reliability of our products.

Creation is our power, Faith is our ideal, and reliability is our goal. Our products are mainly for high and low temperature, but KOME<sup>®</sup> aims to be a warm enterprise to all of our customer, supplier and employees.
